EXPERIENCE

Software Engineer

Apr 2024 - Present

Society for Worldwide Interbank Financial Telecommunication (Swift)

- Orchestrated multi-service application with Docker Compose for development infrastructure to enable single command deployment
- Added support in application for new ISO message version
- Migrated application from Thales Hardware Security Module (HSM) 6 to 7
- Developed Confirmation of Payee feature to minimise the possibility of frauds
- Investigated application issues in test and production environments with problem solving mindset and ability to read logs
- Handled 24/7 rotational on-call support for critical production issue

Associate Software Engineer

Feb 2023 - Mar 2024

Society for Worldwide Interbank Financial Telecommunication (Swift)

- Conducted annual health check of participants' software
- Enhanced traffic log to capture more enriched data
- Improved health check efficiency by automating manual checks

Software Engineer Intern

Aug 2022 - Feb 2023

Society for Worldwide Interbank Financial Telecommunication (Swift)

- Migrated 6 build pipeline from Jenkins to Cloudbees
- Conducted knowledge sharing about CloudBees migration
- Migrated 1000+ JUnit 4 unit tests to JUnit 5 to reduce technical debt
- Co-facilitated 2 communication skills workshops for the engineering chapter to improve communication skills
- Updated COTS used by products

EDUCATION

Bachelor's Degree

Sep 2019 - Feb 2023

Universiti Tun Hussein Onn Malaysia

CGPA 3.89

Computer Science (Software Engineering) with Honour

SKILLS

Languages and Frameworks: Java, Spring Boot, Maven, C++ and Node.js

- Developed and maintained Java and C++ applications
- Competed in competitive programming competitions with C++
- Implemented Node.js to develop the backend of Oxygenates

Tools and Technologies: Git, RHEL, Jenkins, Bash, JUnit, Docker Compose, AIX

- Practices proper version control management
- Knowledgeable with RHEL OS as it is used on daily basis

Web Development: HTML, CSS, JavaScript, React and Bootstrap

- Developed and hosted a personal portfolio with HTML, CSS and Bootstrap
- Built Oxygenates using React, MongoDB, Express, Node.js
- Developed an investment calculator with React

PERSONAL PROJECTS

Oxygenates

[Demo](#) | [Code](#)

Developed an aquaponic e-commerce system with forum feature with MongoDB, Express.js, React and Node.js

Allows users to purchase aquaponics accessories and discuss about aquaponic

AlgoCalc

[Demo](#) | [Code](#)

Developed an investment calculator with React and shadcn/ui

Allows users to calculate return of investment based on few parameters

AWARD, HONOURS AND ACTIVITIES

Touch n' Go eWallet Young Entrepreneurship Challenge 2022 (2022)

Awarded 1st runner-up by pitching the idea GOcity to improve user satisfaction and promote continuous usage

Traditional Development vs Low Code Development Webinar (2022)

Speaker of a live webinar about traditional development and low code/no code development for 60 undergraduate students

Google Kickstart (2021-2022)

Achieved top 3000 in global competitive programming competition by implementing data structure and algorithm with C++ programming language
